GeoICT4e 1 Ardhi Uiversity 1 Dar es salaam

Multi-competence learning challenge

I participated in GeoICT4e, a multi-competence learning challenge conducted by esteemed universities including the University of Turku from Turkey and Ardhi University. The program focused on developing solutions using a multi-disciplinary approach, geospatial tools, and digital skills for clients. As an active member, I played a vital role in creating the "Eco Bin" mobile application using Flutter to address solid waste management. This experience sharpened my innovation, creativity, collaboration, teamwork, critical thinking, and problem-solving skills. GeoICT4e has enriched my expertise in technology and environmental sustainability, paving the way for future contributions in this field.

Networking project

I participated in the design of a wireless network for Ardhi University by implementing VLANs within the university's network infrastructure. This was accomplished using Packet Tracer software and involved configuring three distinct user groups. The objective was to allow only administrators to monitor all users and assign varying levels of privileges to each user category. Subsequently, I created a project report using Microsoft Word to document the entire projec

Final Dissertation 1 Dar es salaam

Electrical energy cconsumption monitoring system

I developed an IoT-based mobile app and admin web interface for real-time electrical consumption monitoring. The mobile app provided users with instant electricity usage data, energy-saving targets, and personalized insights. The admin web interface enabled efficient management and monitoring across multiple devices and users. This project showcased my expertise in IoT, mobile app development, and web design, promoting sustainability and energy conservation.
